

## Base Station Power Supplies

We offer a comprehensive range of Power Supplies

However, we do recommend for Two Way Radio the following:-

- **POW-106BB (Dual Meters)**
- **POW-107BBT MK1**
- **POW-107BBT (Dual Meters)**

### NOTE:

Please ensure that the PSU you offer your Client has NRCS Certification. Radio Comms Warehouse spends lots of time and money to have our Power Supplies approved and certified.

Please see our NRCS Certification.

These PSU's are **NOT** designed as stand-alone Battery Chargers.

These PSU's are **NOT** designed and rated for continuous use as may be required by example for CCTV Cameras.

All Battery back-up options are trickle Chargers.

The PSU's should **ALWAYS** be **EARTHED**. If you do not earth the PSU the over voltage protection is lost.
