

## Audio Accessories - Selection

### AUDIO ACCESSORY – SELECTION

1. A Portable Two-Way Radio carried on the Belt using a Audio Accessory is more user friendly than having to carry the Radio and eliminates Radio chatter in the Shop, Factory, Office etc. environments when using Headsets.
2. Audio Accessories can help in noisy environments such as Factories and can be used with a Hard Hat on construction sites.
3. Covert appearance can also be achieved using an Acoustic Tube.
4. Throat Microphones will operate under all noise conditions.
5. Differing grades enable you to custom match each user with different type of Headset.
6. Some Headsets come with VOX/PTT switch capabilities.
