

Battery Back-Up Exchange Box

- Nova Code: **POW-111BBU**
- The unit is connected in-line between the load and PSU
- During a power failure the Exchange Box directs the DC power from the Battery to the load
- Maximum continuous load draw of 25A (Output)
- Designed for high sites

Specifications	POW-111BBU
Input Voltage	11 - 15V DC
Float Charge Profiles	12V DC
Maximum Float charge available	13.3V DC Input - 12.5V DC
To Battery at various primary input voltages	15V DC Input - 14.2V DC
Output current	0.6 – 5A
Operating Temperature	-10 to + 60°C

Features
Easy to hook up connection box with Cables and Connectors for Battery and PSU
LED indicator showing Battery power of PSU or primary power
Suitable for wide range of 12V DC systems
Screw on DC output Terminals
100 x 80 x 80mm
